Max: The Curse Of Brotherhood Free Download [full Version]

( ) jeremy31: we used to have problem with the usb drive. Some kernel module was causing all usb devices to be hard-blocked. Once fixed we had to correct the device names. I can't recall the details TJ-: i've seen that error before too, i think you can try installing linux-generic-lts-vivid or something instead of linux-generic-lts-xenial see if that helps EriC^^: we are talking about a Lubuntu installation here. aha EriC^^: the install failed, so I'm hoping to reboot to the install and retry again TJ-: i see This link might be useful TJ-TJ-: check /var/log/apt/history.log jeremy31: oh, thanks I'd forgotten about that EriC^^: "history.log is not writable" o.O type sudo -i to get a root shell try sudo -s or sudo -i EriC^^: OK, I got back to the installer and restarted it great EriC^^: "fix broken packages" successful (y/n)? TJ-: hmm yeah, try restarting you can always apt-get -f install "bootloader installation failed" let me try again ok seems to have found and fixed the
